6298.0.55.001 - Labour Force Survey Standard Errors, Data Cube, May 2013

Previous ISSUE Released at 11:30 AM (CANBERRA TIME) 13/06/2013

Summary

About this Release

This spreadsheet allows the calculation of standard errors for estimates from the monthly Labour Force Survey (LFS).

The spreadsheet can be used to calculate the standard errors for the 2011 Labour Force Survey Sample Design, introduced in the May 2013 release of Labour Force, Australia (cat. no. 6202.0). For further information, see Information Paper: Labour Force Survey Sample Design, May 2013 (cat. no. 6269.0).

The SE models for July 2013 (50% old sample, 50% new sample) and onwards will be subject to revisions in the future, as more information is known about the new sample after it has been introduced.

For information on how to use this spreadsheet see Information paper: Labour Force Survey Standard Errors, 2005 (cat. no. 6298.0).

History of Changes

This document was added or updated on 07/08/2013.

5/8/2013 - Spreadsheet updated to reflect minor changes to the standard error models for July 2013 onwards, with the most noticeable changes to the ACT and NT relative standard errors.
